SUMMARY

Front-End Developer with a approximately two-year track record in developing and creating user-friendly web applications across diverse domains. Proficient in JavaScript, React.js, and modern web technologies like Tailwind CSS and Bootstrap. Renowned for delivering responsive interfaces, integrating third-party APIs, and improving workflows through efficient project execution and collaboration.

EXPERIENCE

React.js Developer

[Sartia Global, India](#)  On-Site  June 2024 - Present

- Crafted intuitive data-driven interfaces using React.js, CSS, JavaScript alongside Google APIs and Chart.js to deliver seamless navigation that improved task completion efficiency by reducing load times from 5 seconds to under 2 seconds.
- Engineered and sustained a highly responsive Admin Panel featuring advanced functionalities like profile management, document handling, time tracking, and recruitment tools; enhanced user experience for over 200 professionals daily.
- Ensured data flow optimization and enhanced task management for professionals and managers by integrating real-time analytics and dynamic UI components.

Front-End Developer

[Sidpik, India](#)  Remote  Sep 2023- May 2024

- Crafted an innovative Admin Panel leveraging React.js and Google APIs; incorporated time tracking features that allowed for real-time monitoring of project timelines, reducing administrative overhead by 15 hours per month.
- Reduced administrative overhead by 20% through real-time time tracking and dynamic UI components.

Frontend Developer (Internship)

[Info Birth, India](#)  On-Site  Apr 2023- Aug 2023

- Contributed to the development of corporate websites with a focus on cross-browser/device compatibility and seamless backend integration.
- Optimized front-end performance and elevated user experience by adhering to best practices in responsive design and implementing modern frameworks.

SKILLS

JavaScript	React	CSS	HTML	MUI
Git/Github	Bootstrap	Redux	Tailwind css	

EDUCATION

Master of Computer Applications

[Andhra University](#)  August 2024 - Present

Bachelor's Degree in Commerce (Honors)

[SOL Delhi University](#)  August 2020 - 2023

CERTIFICATION

[Advanced JavaScript](#)  Jan 2023- March 2023

Completed training program in Frontend Development at Dreamer Infotech.

STRENGTHS

I

Proficiency in Modern Front-End

Skilled in JavaScript, React.js, and frameworks such as Tailwind CSS and Bootstrap, enabling the development of responsive and dynamic web applications.

II

API Integration

Adept at integrating third-party APIs to enhance functionality, ensuring seamless data flow and efficient system performance.

III

Problem-Solving and Collaboration

Proven ability to collaborate effectively with cross-functional teams, delivering user-friendly solutions that improve workflows and user experience.

PROJECTS

SSHEQ (Safety, Security, Health, Environment, and Quality)

- Developed risk assessments and training programs to enhance employee awareness.
- Created stakeholder and contractor modules for improved management and training.
- Designed health promotion program modules, ensuring compliance with occupational health standards.

CMS Complaints Management System

- Developed a complaints management system using React and Bootstrap to log, track, and resolve organizational complaints efficiently.
- Enabled Super Admin to assign multiple contractors/users to handle complaints concurrently.
- Implemented role-based access control with status tracking and notification features.
- Integrated APIs to enhance functionality, improve accountability, and streamline workflows.

B2XEcommerce

- Created an ecommerce-focused admin panel using React.js, Bootstrap, and Chart.js, seamlessly integrating APIs for dynamic data management. Empowered efficient online store management with intuitive interface and comprehensive data visualization.

Task Manager

- Developed using React with React Router for routing, and local storage for data persistence.
- CRUD operations for tasks/lists, user authentication (signup/login) managed with local storage, protected routes, responsive design.
- Task management (add/edit/delete tasks/lists), user management (registration/login), session management using local storage, error handling.
- Since data is stored locally, the app loads tasks and user information quickly, providing a snappy and responsive user experience.
