

NIDHI YADAV

Frontend Developer | React.js | JavaScript | TypeScript | Redux Toolkit | Next.js | Tailwind CSS | 3 Years
Faridabad, Haryana 121003 | [+91 7428816158](tel:+917428816158) | webdev.nidhiyadav@gmail.com | linkedin.com/in/nidhi-yadav1 | madebynidhi.netlify.app

PROFESSIONAL SUMMARY

Frontend Developer with 3 years of professional experience building responsive, scalable, and user-centric web applications using React.js, JavaScript, TypeScript, Redux Toolkit, Next.js, and Tailwind CSS. Experienced in developing enterprise applications, CMS platforms, admin dashboards, and government-facing web portals. Strong experience in REST API integration, reusable component development, state management, responsive UI development, and performance optimization.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling: Tailwind CSS, Bootstrap, Material UI (MUI), SCSS

State Management: Redux Toolkit, RTK Query, Context API

API Integration: REST APIs, Axios, Fetch API, Async/Await

Performance: Lazy Loading, Code Splitting, Rendering Optimization

Backend / Cloud: Firebase (Authentication, Firestore, Hosting, Storage), Google APIs

Tools: Git, GitHub, VS Code, Chrome DevTools, Vite, Vike, Electron

Concepts: Responsive Design, Cross-Browser Compatibility, Mobile-First Design, Component-Based Architecture, Clean Code Practices

WORK EXPERIENCE

Frontend Developer | DJXLABS (Digital Jalebi), India

Jul 2025 - Present

- Developed scalable React.js applications for government campaigns and CMS platforms, delivering responsive user interfaces with role-based dashboards, real-time data management, and secure workflows.
- Integrated third-party services including Google APIs, Firebase, Tiptap, and TalkJS to enable content management, customer communication, and dynamic website generation.
- Built reusable, performance-optimized UI components that improved application responsiveness, maintainability, and user experience across multiple enterprise projects.

React.js Developer | Sartia Global, India

Jun 2024 - Jun 2025

- Crafted intuitive, data-driven interfaces using React.js, CSS, JavaScript, Google APIs, and Chart.js, reducing page load times from 5 seconds to under 2 seconds (60% improvement).
- Optimized data flow and enhanced task management for professionals and managers by integrating real-time analytics and dynamic UI components.

Frontend Developer | Sidpik, India (Remote)

Sep 2023 - Feb 2024

- Developed and maintained the frontend of a comprehensive Admin Panel, enhancing user experience and productivity.
- Designed and implemented a responsive, user-friendly Admin dashboard enabling professionals and managers to efficiently handle admin data and tasks.
- Built dynamic and interactive features using React.js, CSS, JavaScript, Google APIs, and Chart.js, including admin profiles; integrated third-party APIs for document management, time tracking, and recruitment.

PROJECTS

GJEPC Blood Donation Campaign

- Developed a government campaign platform for blood donation registration, pledge participation, and video wishes using React.js.
- Built a responsive user application and admin dashboard to manage participant data, videos, and campaign activities in real time.
- Implemented role-based access control, status tracking, and notification features for secure workflow management.

GJEPC Jewel Pages

- Developed the complete frontend, admin panel, and service provider panel for the GJEPC Jewel Pages platform.
- Integrated TalkJS for customer support, inbox management, and communication between users, service providers, and administrators.
- Built responsive and scalable modules with secure data handling, improving workflow efficiency and user engagement.

AI PhotoBooth

- Built an AI-powered photo booth application that generated themed portraits using face-swapping technology.
- Developed an automated image processing workflow for real-time photo generation and event sharing.

DJXLABS CMS Website

- Built a CMS dashboard using React, TypeScript, Tiptap, and Firebase for content editing and website management.
- Developed a Vike-based SSR frontend to render dynamic, template-driven pages from dashboard-managed content.
- Implemented a dynamic website generation system converting static HTML/CSS/JS templates into reusable, database-driven web pages.

SSHEQ (Safety, Security, Health, Environment & Quality)

- Developed risk assessment, training, stakeholder, and contractor management modules using React.js.
- Built health promotion modules to improve employee safety awareness and ensure compliance with occupational health standards.
- Collaborated with a 4-member team to deliver scalable and reusable frontend components.

Complaints Management System (CMS)

- Developed a complaints management system using React.js and Bootstrap to log, track, and resolve organizational complaints.
- Enabled Super Admin to assign multiple contractors/users while implementing role-based access control.
- Integrated REST APIs with status tracking and notification features to streamline complaint workflows.

B2X Ecommerce

- Developed a responsive ecommerce admin panel using React.js, Bootstrap, and Chart.js.
- Integrated REST APIs for dynamic data management, order tracking, and dispute resolution.
- Improved store management with interactive dashboards and comprehensive data visualization.

EDUCATION

MCA Andhra University	2024 - Present
B.Com (Hons) SOL, Delhi University	2020 - 2024

CERTIFICATIONS

Frontend Development Training Program — Dreamer Infotech (Jan 2023 - Jun 2023)
